Subject: RE: Technical Discussion on Next Steps for Upper Animas Project Planning

Doug – I'll send out a conference call # so if you can call in that would be great. There is a couple of items that it would be helpful for the State to weigh-in on for this discussion.

Paula Schmittziel

Remedial Project Manager

U.S. Environmental Protection Agency

1595 Wynkoop St.

Denver, CO 80202

Office: 303-312-6861

Fax: 303-312-7151

Cell: 720-951-0795

From: Jamison - CDPHE, Doug [mailto:doug.jamison@state.co.us]

Paula,

Unfortunately, I won't be able to attend, but I can probably call in, even if it might be a few minutes late.

Doug Jamison

Superfund/Brownfields Unit Leader

State of Colorado, Dept. of Public Health and Environment

4300 Cherry Creek Drive South, Denver 80246

office: 303.692.3404 |fax: 303.691.7878

The purpose of this meeting will be for a technical discussion on where we need to go next in terms of site characterization of the Upper Animas River watershed. The following topics will be included in the discussion but there may others that should also be included.

1. Aquatic Ecological Risk Assessment – where are we and what additional investigations are planned or needed?
2. Characterization of the Upper Animas River above Silverton – Silverton to Howardsville; Howardsville to Eureka; Eureka to the headwaters of the UA.
 - Scope of Work for next season
 - Long-term (>1 year)
3. OTEQ Model – Next Steps
4. Evaluation of existing data – EPA/BLM data and ARSG data from the UAA
5. Mapping of data – Steve Way
6. How do the technical needs fit into a joint EPA, BLM & State letter to SGC to participate in further investigation to understand the problem?

- I expect that once the technical needs have been flushed out we will schedule a separate meeting between the program managers and the attorneys for the 3 agencies in drafting the letter that will reflect what is reasonable to ask of SGC with respect to where they have liability.

Kay – We will have a conference line if you can call in? Let me know.
